Hiring team
Example Support Company

Dear Hiring Manager,

I am applying for the IT support analyst position. In my current role, I investigate access problems, document resolutions and explain the next step to colleagues who are not technical.

Your posting asks for clear escalation notes. I maintain the handover checklist our support team uses to record the affected system, troubleshooting already completed and the next owner. This gives incoming staff a specific starting point instead of an unexplained ticket.

I would welcome a conversation about how this experience could support your service desk. Thank you for considering my application.

Sincerely,
Alex Morgan
